

SOMETIMES ONE IS MORE THAN TWO.

THE FACTS BEHIND THE REINKE SINGLE LEG TOWER.

With the use of high-strength steel and superior engineering, Reinke created the single leg tower, which weighs as much as 700 pounds less than competitive towers. We dare you to compare its unique 8" x 3" x 1 1/4" custom roll-formed design to the simple angle iron design of our competitors. Coupled with one of the widest tower bases in the industry, it provides improved flotation and reduces wear on critical driveline and structural components for enhanced performance and longevity. To learn more on the many ways Reinke does it different yet better, stop in or call us for more information.
